- HAIR REMOVAL THERAPY
- MASSAGE (FACE AND BODY) THERAPY
- TREATMENTS FOR IN GROWING HAIRS GALVANIC ELECTROLYSIS (SAFE ALTERNATIVE TO LASER)

SEMI PERMANENT MAKE UP BODY WRAP TREATMENT

A targeted natural slimming treatment for the hips, thighs and abdomen. Helps to firm and tighten the skin, reduce inches and minimize the appearance of cellulite. Leaves skin revitalised and remodeled with a smoother texture. Most effective when done in a series of six treatments and will deliver serious results in just three weeks.

Microdermabrasion is a simple non-invasive procedure that helps to smooth out fine wrinkles, restore even skintone and texture, decreases blotchiness and stimulates collagen production. Microdermabrasion takes a short period of time and clients can return immediately to their daily routine.
